```
Question 1
Correct
Mark 1.00 out of 1.00
```

```
Convert the following algorithm into a program and find its time complexity using counter method.

Factor(num) {

{

for (i = 1; i <= num;++i)

{

if (num % i== 0)

{

printf("%d ", i);

}

}

Note: No need of counter increment for declarations and scanf() and counter variable printf() statement.

Input:

A positive Integer n

Output:

Print the value of the counter variable
```

Answer:

```
#include<stdio.h>
 2 void Factor(int num) {
 3
        int counter=0;
        for (int i = 1; i \le num; ++i)
 4
 5 •
 6
 7
            counter++;
 8
            if (num % i== 0)
 9
10
              //printf("%d ", i);
11
12
              counter++;
13
14
            }
15
           counter++;
16
17
        counter++;
        printf("%d",counter);
18
19
20 •
     int main(){
21
         int num;
22
         scanf("%d",&num);
23
24
         Factor(num);
25
   }
```

	Input	Expected	Got	
~	12	31	31	~
~	25	54	54	~
~	4	12	12	~

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
